

POLSC 401: MIGRATION POLITICS

Spring 2025

Dr. Michael Tyburski

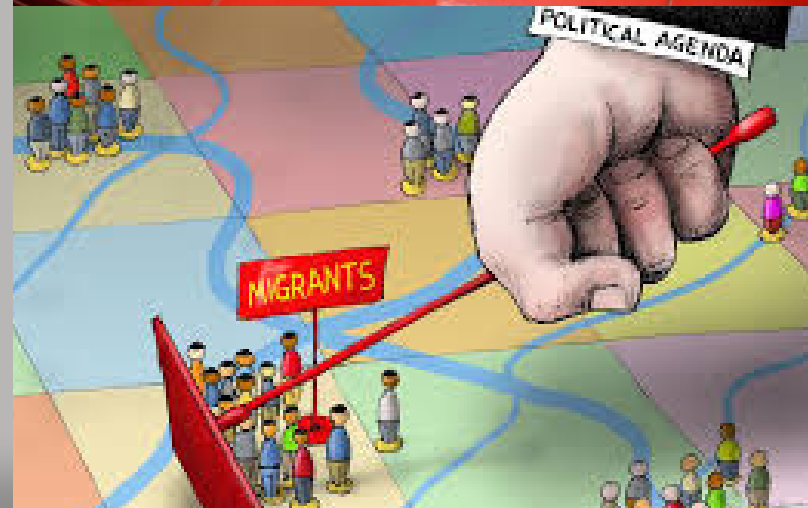

Tuesday & Thursday

2:30-3:45 PM

Did you know that **more than 280 million people** live outside of their countries of birth? That's more than the 5th largest country! How about the roughly **650 billion dollars** sent by migrant workers back to their families at home? That's more than Sweden's economy! Curious about how these staggering movements of people and money transform politics?

POLSC 401: Migration Politics connects you to the stories behind the numbers.

Why do people move? How do they affect politics in host states? What about in migrants' countries of origin? Do governments leverage migrants in international relations?

Think migration policy does not affect you?

The US is a global hub, hosting about 20% of the world's migrants and was the source of \$73 billion dollars sent abroad in 2022.

You should take this class.
